SUMMARY

Software Development Engineer with hands-on experience in full-stack development, backend engineering, REST API design, and AI-powered applications using JavaScript, React.js, Node.js, FastAPI, MongoDB, and MySQL. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and scalable software development through industry internships and real-world projects.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python

Frontend: HTML5, CSS3, React.js

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication

Database: MongoDB, MongoDB Atlas, MySQL, PostgreSQL

Tools & Platforms: Git, GitHub, Postman, VS Code

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Authentication & Authorization, API Development, Retrieval-Augmented Generation (RAG)

TRAINING & EXPERIENCE

Software Development Intern | Hindalco Industries Ltd.

Sept 2024 – Sept 2024

- Designed and developed a Library Management System to digitize book inventory, issue tracking, and member management processes.
- Automated manual record-keeping workflows, reducing administrative effort by approximately 40%.
- Developed backend modules and database operations to manage 1,000+ library records efficiently.
- Improved data retrieval and search performance, reducing average lookup time by nearly 30%.

Software Development Engineer Intern | Bluestock Fintech (Remote)

Jul 2025 – Aug 2025

- Developed an IPO Web Application and REST APIs using React.js, Node.js, and PostgreSQL following industry-standard system architecture.
- Converted Figma UI/UX designs into responsive and reusable frontend components.
- Designed and tested RESTful API endpoints using Postman with documented validation workflows.
- Optimized backend architecture and database operations to support increased concurrent users.
- Maintained version-controlled development workflows using Git and GitHub while preparing deployment-ready production code.

PROJECTS

HaqBot — AI-Powered Legal Assistance Platform

GitHub

- *Tech Stack:* Node.js, Express.js, JavaScript, HTML5, CSS3, Google Gemini 1.5 Flash, SSE, PDF-Parse, Mammoth, JSON Database, PBKDF2 Authentication
- Built an AI-powered legal assistant supporting 7 regional languages with real-time streamed responses using Server-Sent Events (SSE).
- Implemented a Retrieval-Augmented Generation (RAG) pipeline grounded on legal precedents, constitutional articles, and uploaded case documents.
- Developed multimodal case analysis workflows capable of processing PDF, DOCX, text, and image-based legal documents.
- Engineered an automated legal notice generation system for consumer disputes, tenant matters, and legal communications.
- Designed a secure advocate onboarding and pro-bono case management workflow using role-based access control.

VocaBay — AI-Powered Voice Commerce Platform

GitHub

- *Tech Stack:* HTML5, CSS3, JavaScript, Node.js, Express.js, MongoDB, Mongoose, Web Speech API, Razorpay
- Developed a full-stack voice-assisted shopping platform integrating speech recognition and speech synthesis for hands-free interactions.

- Engineered natural language command processing with continuous speech matching and keyword-based navigation.
- Built RESTful APIs for product catalog management, vendor onboarding, authentication, and order processing.
- Optimized asynchronous product-loading workflows and database schema design to improve application reliability.
- Integrated Razorpay payment workflows and dynamic product search capabilities.

Type-2 Diabetes Prediction System — AI-Powered Healthcare Web App

- *Tech Stack: Python, Flask, Scikit-learn, MongoDB, HTML, CSS, JavaScript, Gmail SMTP*
- Developed a machine learning application for diabetes risk prediction using Gradient Boosting and clinical health indicators.
- Implemented secure user authentication and OTP-based verification workflows.
- Engineered data preprocessing and feature extraction pipelines utilizing BMI, Glucose, Insulin, and related health metrics.
- Built an intuitive web interface enabling users to assess diabetes risk through predictive analytics.

EDUCATION

Bachelor of Technology in Computer Science and Engineering	2022 – 2026
United College of Engineering & Research, Greater Noida — CGPA: 7.25	

CERTIFICATIONS

Summer Internship Certificate – Hindalco Industries Ltd. (Aditya Birla Group)	2025
Credential Link	
Software Development Internship Certificate – Bluestock Fintech	2025
Credential Link	
Certificate of Participation (Machine Learning) – Softpro India Computer Technologies (P) Ltd.	2024
Credential Link
